PROFESSIONAL SUMMARY

- **Platform & DevOps Engineer** with 3+ years building cloud-native infrastructure on AWS, GitOps workflows with ArgoCD, and container orchestration using Kubernetes (EKS) and Docker.
- Experienced in **Infrastructure as Code (IaC)** via Terraform and CloudFormation, CI/CD automation with Jenkins and GitHub Actions, and observability using Prometheus and Grafana.
- Delivered **50% faster deployments**, 40% infrastructure cost reduction, and zero security incidents across production environments.
- Passionate about internal developer platforms (IDP), self-service infrastructure, and golden-path tooling.

EXPERIENCE

Software Engineer — Platform, DevOps & Backend

Jan 2023 – Present

Hidden Brains Infotech Pvt. Ltd., Ahmedabad

- Architected AWS infrastructure (EC2, EKS, ECS, ECR, Lambda, RDS, S3, CloudFront, IAM) for 10,000+ daily transactions across dev/staging/production environments.
- Implemented IaC using **Terraform** and CloudFormation for version-controlled, repeatable cloud provisioning—eliminating 100% of manual environment setup errors.
- Set up **GitOps** deployment pipelines using ArgoCD on Kubernetes (EKS) with Helm charts, namespace-based isolation, and RBAC for zero-downtime rollouts.
- Built observability stack with **Prometheus** and **Grafana** for real-time visibility into infrastructure health and resource utilization.
- Designed CI/CD pipelines using Jenkins and GitHub Actions, cutting deployment time by 50% and eliminating all manual release steps.
- Implemented AWS serverless architecture (Lambda + Docker + API Gateway), reducing infrastructure costs by 40% while maintaining 99.9% uptime.
- Enforced platform security via IAM least-privilege roles, Security Groups, MFA, and OPA-based policy controls—zero security incidents over 2+ years.
- Developed Python/Django REST APIs with 30% response time improvement via query optimization and Redis caching.

PROJECTS

GitOps Platform Lab

Kubernetes, ArgoCD, Helm, Prometheus, Grafana, Terraform, k3s

- Provisioned k3s cluster via Terraform; deployed ArgoCD for GitOps-driven CD with self-healing and drift detection.

Bankpe — Cloud & DevOps Platform

AWS, Terraform, Docker, EKS, Jenkins, Django

- Provisioned full AWS stack as Terraform modules; built Jenkins pipelines for zero-downtime ECS/EKS deployments.

Xoom App — Scalable Cloud-Native Backend

Django REST, AWS RDS, Docker, CloudWatch, Jenkins

- Built containerized microservices on AWS ECS; implemented CloudWatch observability with automated metrics/alerts.

TECHNICAL SKILLS

- **Cloud (AWS):** EC2, EKS, ECS, ECR, Lambda, S3, RDS, CloudFront, IAM, CloudWatch, Auto Scaling, Load Balancer.
- **Containers & K8s:** Kubernetes (EKS, k3s), Docker, Helm, Docker Compose, RBAC, Namespace isolation.
- **IaC & GitOps:** Terraform, CloudFormation, Infrastructure as Code, ArgoCD, GitOps workflows, Drift detection.
- **CI/CD & Obs.:** Jenkins, GitHub Actions, Prometheus, Grafana, Zero-downtime deploys, Metrics & Alerting.
- **Security:** IAM, OPA/Gatekeeper, Security Groups, MFA, SSL/TLS, Least-privilege access, Network ACLs.
- **Backend & DB:** Python, Django, DRF, Celery, RabbitMQ, PostgreSQL, MySQL, Redis, Query optimization.

CERTIFICATIONS

- AWS Certified Solutions Architect — Associate (SAA-C03) *In progress — Q3 2025*
- Amazon EC2 Fundamentals (AWS) | Introduction to Linux (Linux Foundation)
- Programming for Everybody — Python (Coursera)

EDUCATION

B.Tech in Information Technology
Parul University, Vadodara

2019 - 2023
CGPA: 7.8
